Duality of ASM Statutory and Customary Systems

**Governance of Customary Artisanal Mining Arrangements**
- Informal Taxes
- Complex Local Level Rules & Regulations
- Community Expectations and Adherence to Local Level Rules and Regulations

**Governance of Statutory Regimes**
- Regulatory Taxes
- Administrative Rules and Regulations
- Complex and Proscribed Procedures

Role of Customary Authorities in Governance of Natural Resources

- Responsible for land management
- Attributes land to people
- Resolves land disputes
- Collects taxes on land and other natural resources
- Controls access to land and use of resources.

Recommendations from “Golden Knowledge” Gained from the NGWESHE Field Experience

Recommendations to the Government of the Democratic Republic of Congo

1. Harmonize the laws governing customary and states taxes in order to reduce the tax burden on the artisanal mining sector.

2. Require an agreement with the customary authorities before authorization of artisanal mining activities. Customary authorities possess considerable power.

3. Promote land policy reforms to account for customary tenure and their buy facilitating economic development and long-term peace in Eastern DRC.

Recommendations for Partners Supporting Formalization of the ASM Sector

1. Build strong relationships with customary authorities to obtain a social license to operate programs and power. Otherwise, these authorities will block initiatives.

2. Invest resources and time to understand the nuanced powers and roles of customary authorities in governing the artisanal mining sector.

3. Carefully consider whether or how to include powerful parties (e.g. Wife of Mwami in the cooperative) in beneficiary selection during project design and implementation.
