MAPPING APPROACHES FOR SECURING TENURE (MAST)

Resource Quick Guide | World Bank Land Conference | May 13-17, 2024

ABOUT MAST

Mapping Approaches for Securing Tenure (MAST) is a collection of participatory mapping approaches used by USAID and its partners to help communities manage, document, and secure their land and resource rights.

MAST blends participatory mapping approaches with flexible technology tools to help local communities who lack access to government services to document, manage, and secure their land and resource rights, improving long-term governance of community land and resources.
